

### THE AVALANCHE HAZARD WILL BE LOW

#### Avalanche Hazard Forecast for Friday 04/04/2014

##### Avalanche Problems

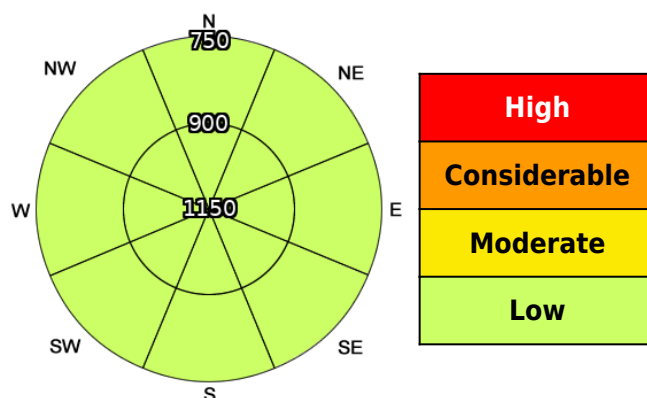

Wet Snow

Cornices

##### Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to thaw at all levels. Overall stability will remain good with localised wet surface snow instabilities found on steeper slopes. Remaining cornices will be prone to collapse. The avalanche hazard will be Low.

##### Forecast Weather Influences

The freezing levels will remain over the summits with rain at all levels during the day. Winds will ease and vary from East to South-South-West by mid-afternoon.

##### Comments

Cornice collapse and rockfall remain a significant hazard.
