

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 21/04/2014

Avalanche Problems

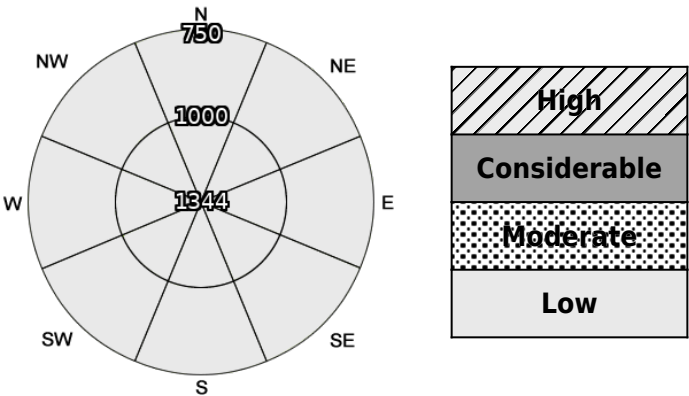

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will firm up overnight and slowly soften during Monday. Localised surface instabilities will develop on steep slopes exposed to solar radiation. Elsewhere snowpack stability will be generally good. The avalanche hazard will be Low.

Forecast Weather Influences

It will remain dry with the freezing level above the summits. Moderate Easterly winds are expected.

Comments

As the spring conditions continue, any remaining cornices will be prone to collapse. Also, there is the continuing hazard of falling ice and rocks from steep ground. This is the last Avalanche Report for this season, thanks for your support over the winter and have a great summer.
