

Avalanche Hazard Forecast for Tuesday 22/04/2014

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Avalanche hazard considerations should always be part of any winter hill goers daily plans and we would recommend that when currently venturing into the hills, continue to note any snow and weather conditions in respect of any potential hazard. Be prepared to modify your plans accordingly. Cornices remain a hazard on many slopes, these are unpredictable and prone to collapse.

	High
	Considerable
	Moderate
	Low

Forecast Weather Influences

Avalanche forecasts are no longer issued for this area. The SAIS forecaster team would like to thank you for your support over the past winter and wish you a good summer.
