Forecast Snow Stability & Avalanche Hazard

Unstable windslab will continue to be deposited on sheltered North-East through East to South aspects above 600 meters where avalanches are likely. Some sheltered locations on other aspects will also be affected. Windward aspects will tend to be scoured and hold little snow. The avalanche hazard will be Considerable.

Forecast Weather Influences

It will remain cold with a freezing level of around 400 metres. Snow showers will continue throughout the period. Strong West or South-Westerly winds will veer to the North-West.

Comments

Although from the road there may not look like huge amount of snow in Glen Coe, there are plenty of unstable deposits in sheltered gullies and hollows.
