

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 02/02/2015

Avalanche Problems

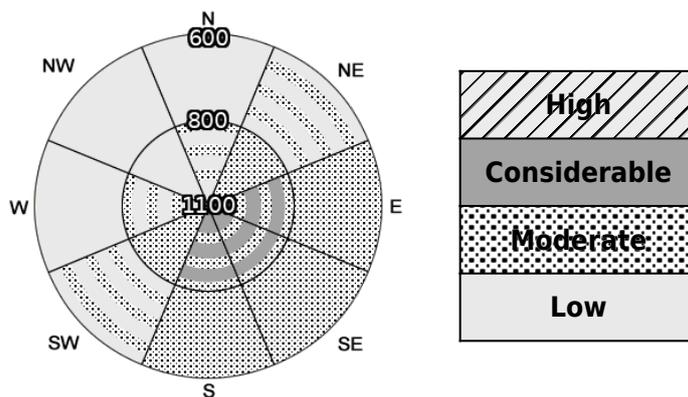

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Localised instability persisting on very steep South- East to South aspects and some selected sheltered East facing gullies above 800m. Better stability at lower altitudes on most aspects and on all recently heavily scoured locations. Cornices will continue to overhang many steep lee slopes. The avalanche hazard will be Considerable

Forecast Weather Influences

No precipitation is forecast. Remaining cold throughout with moderate West-North-Westerly then Westerly, later West-South-Westerly winds.

Comments

A dry day in prospect. Travel off the beaten path not for the faint-hearted at present.
