

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 08/02/2015

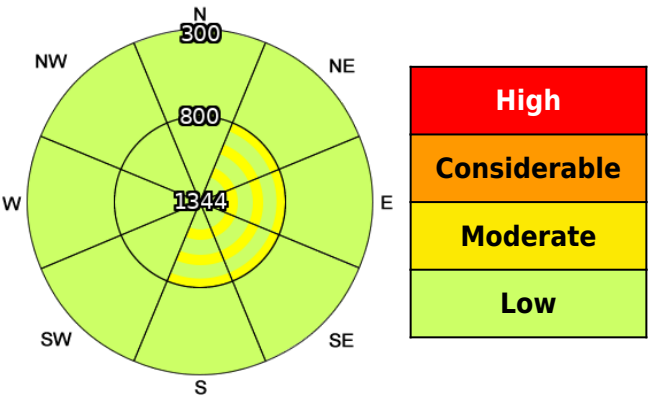

Avalanche Problems

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

The snowpack will generally soften through the day as the temperature rises, and cloud and drizzle dampen the snowpack. The snowpack will continue to slowly consolidate. A few minor instabilities will remain on steep North-East through East to South aspects above 800 metres. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will gradually warm up through the period. It will be generally dry overnight and through the morning with some light drizzle during the afternoon.

Comments

Little or no fresh snow expected in the foreseeable future.
