

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Thursday 12/02/2015****Avalanche Problems**

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will soften where exposed to the sun but remain generally well bonded at all levels and in all locations. Higher plateau areas will be icy with some areas snow free. Cornices will require care, particularly where affected by the sun. The avalanche hazard will be Low.

**Forecast Weather Influences**

It will be a bright day with the freezing level around the summits. Winds will be moderate from around the South-West.

Comments

Some snow loss, particularly on sun affected slopes. Very firm and icy in places.
