

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 14/03/2015

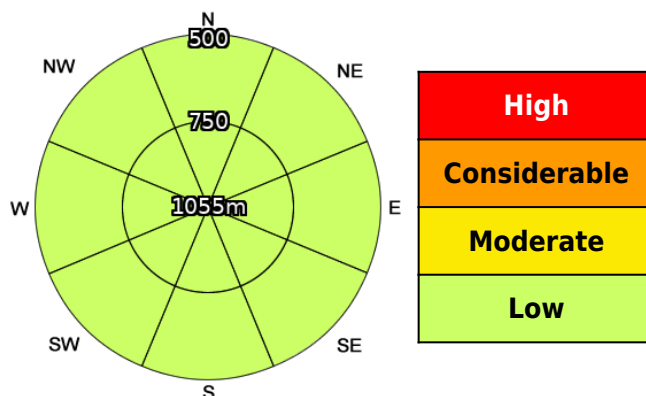

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will refreeze at all levels overnight remaining stable and well bonded. Residual cornices will soften in the sun during the day. The avalanche hazard will be Low.

Forecast Weather Influences

Light to moderate South-East winds will become predominantly Southerly during the day. Freezing at all levels overnight rising to around the summits during a sunny day.

Comments

More snow than anticipated on North and East aspects. Very noticeable transition from softer snow to very hard neve when stepping into the shade!
