

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 09/04/2015

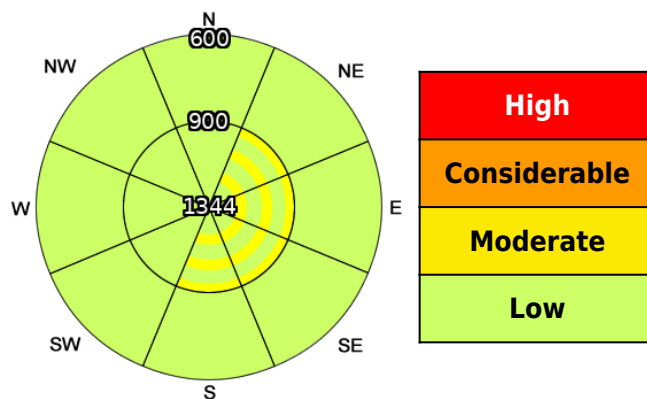

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack is likely to firm up during the night. It will soften through the day, particularly on aspects exposed to the strong sunshine. Instabilities will exist on steep North-East through East to South aspects. Remaining cornices will be prone to collapse. The avalanche hazard will be Moderate.

Forecast Weather Influences

The settled conditions are expected to continue. After a dry night it will be a sunny day. The freezing level will be above the summits.

Comments

Rock and ice fall a hazard in the continuing mild conditions.
