

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 19/04/2015

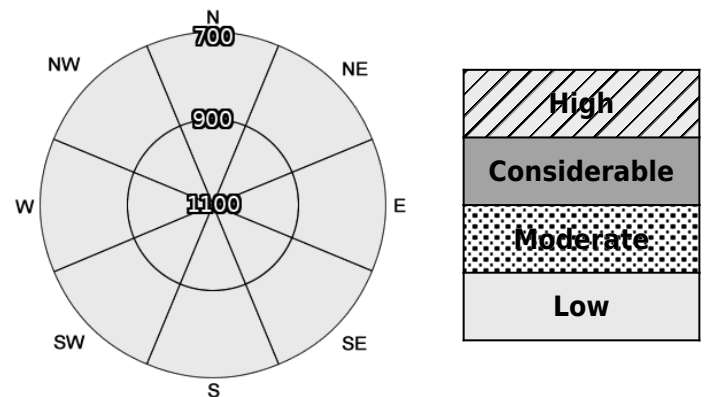

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

Little immediate change. The snowpack will be stable at all elevations, re-frozen in shaded Northerly locations above 900m. Old cornice remnants above lee, mostly North-East to Easterly aspects remain suspect in the warmer daytime temperatures. The avalanche hazard will be Low

Forecast Weather Influences

High pressure, it will remain dry and settled throughout with temperatures continuing to fluctuate around summits. Winds will be light mainly East-North-East

Comments

This our last report for the season, have a great summer, see you again next year.....
