Avalanche Hazard Forecast

Issued 07/01/2016

FOR PERIOD 18:00HRS Thu 07/01/2016 TO 18:00HRS Fri 08/01/2016

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 08/01/2016

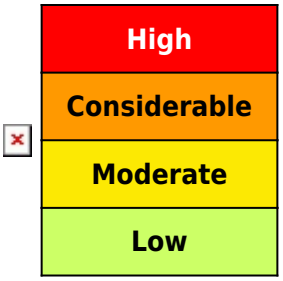

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The existing older snow pack will remain generally stable. Some isolated pockets of wind slab instabilities will develop around high Corrie rims and gully tops above 800 metres on South - West to Northerly aspects. The avalanche hazard will be Moderate.

Forecast Weather Influences

Moderate strength South-Westerly winds will back Easterly become lighter and the back North - Easterly. The freezing level will be around 600 metres. There will be some light showers of snow this evening and into the night.

Comments

Cloudy on the tops but white in the high corries with snow building.
