

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Friday 12/02/2016

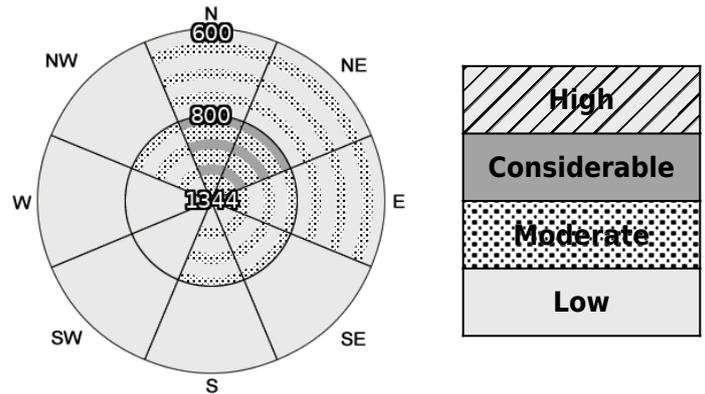

Avalanche Problems

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

Localised areas of unstable snow will persist mainly on steep North and North-East aspects above 800 metres. In many other locations, accumulations of unconsolidated but generally stable snow will be present, but some moderately stable accumulations will be present in isolated steep and wind sheltered locations. The avalanche hazard will be Considerable

Forecast Weather Influences

It will be cold and dry with Easterly winds increasing slightly during late afternoon.
