Avalanche Hazard Forecast

Issued 14/02/2016

FOR PERIOD 18:00HRS Sun 14/02/2016 TO 18:00HRS Mon 15/02/2016

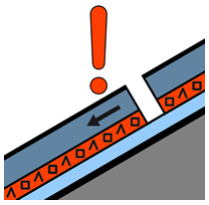

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 15/02/2016

Avalanche Problems

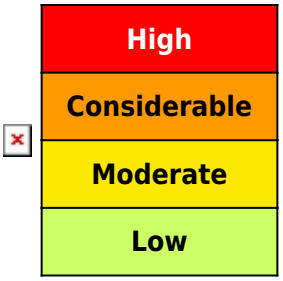

Wind Slab

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. Areas of windslab will exist on many aspects above 800 metres. North-East to South-East aspects will tend to hold areas of older, moderately bonded hard slab. South to West aspects will hold less extensive patches of fresh, soft, poorly bonded windslab. The avalanche hazard will be Considerable

Forecast Weather Influences

Cold conditions continuing with moderate winds easing through the period. After a few overnight snow showers it will be a dry day. The freezing level will be around 300 metres.

Comments

Currently quite a complex picture in terms of windslab distribution and stability.
