Avalanche Hazard Forecast

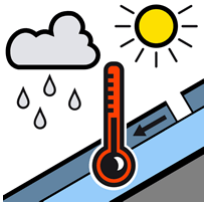

Issued 13/03/2016

FOR PERIOD 18:00HRS Sun 13/03/2016 TO 18:00HRS Mon 14/03/2016

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 14/03/2016

Avalanche Problems

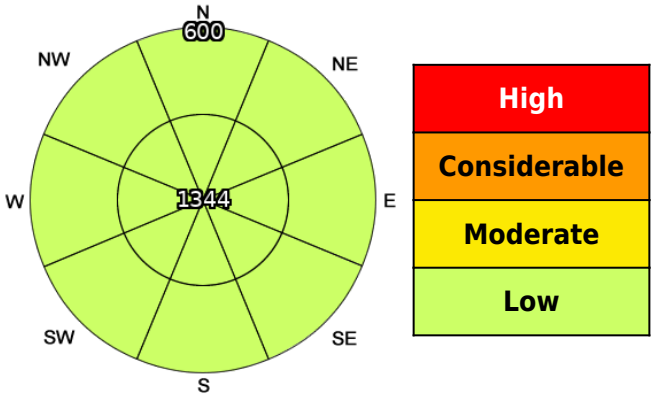

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to slowly consolidate at all levels. Snow stability will be generally good. Localised surface instabilities will be present on some steep aspects, notably those exposed to solar radiation. Remaining cornices will be prone to collapse with debris potentially running to lower elevations. The avalanche hazard will be Low

Forecast Weather Influences

It will be dry with light South-Easterly winds. The freezing level will be above the summits.

Comments

Cornice debris could run to lower elevations so please be aware of what's above you
