

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 15/03/2016

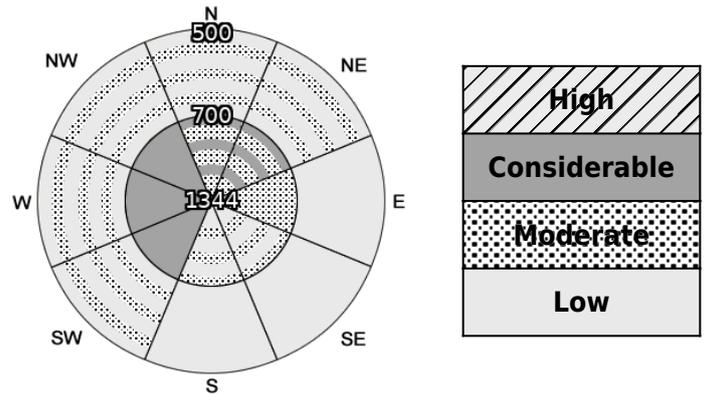

Avalanche Problems

Wet Snow

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to consolidate and will be generally well bonded and stable in all areas. However, as the day progresses, warm temperatures and sun affected slopes may produce surface instabilities on steep mostly East to South facing slopes. The avalanche hazard will be Low

Forecast Weather Influences

Light South-South-Easterly winds overnight backing Easterly then moderate South-Easterly. A dry day is expected with a freezing level well above the summits.

Comments

A firm snowpack early morning softening as became affected by the sun.
