

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 18/03/2016

Avalanche Problems

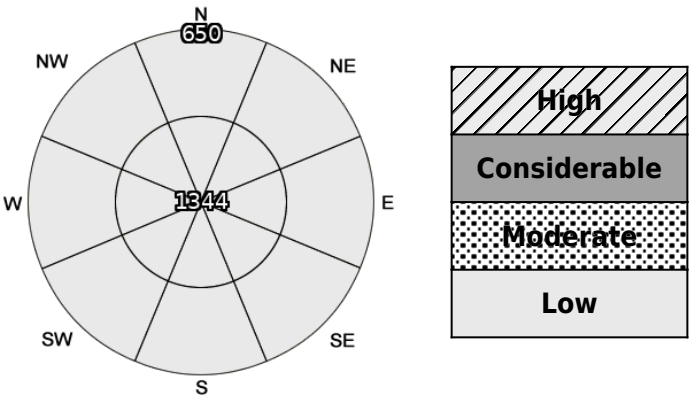

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain generally well bonded and stable. An overnight refreeze is expected, followed by softening particularly in the sun during the day. Localised wet snow instabilities will be present on steep slopes exposed to the sun. Cornices will be prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Light to moderate North to North-East wind. Dry with freezing level well above the summits.

Comments

Rock and ice fall and cornice collapse remain hazards in the warm conditions.
