

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Sun 10/04/2016 TO 18:00HRS Mon 11/04/2016

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

It will remain generally dry, although with the risk of a light shower during the afternoon. The freezing level will rise above the summits through the day. Moderate winds will be from the East.

Forecast Snow Stability and Avalanche Hazard

Some surface instabilities will remain on steep slopes above 900 metres. North-East to South-East aspects will be most affected. Cornices will be prone to collapse. The avalanche hazard will be Moderate.

Observed Avalanche Hazard - Sun 10/04/2016

Observed Weather Influences

After a clear and frosty night it was a dry day with some clear spells. The freezing level rose above the summits through the day. Light winds were from the East.

Observed Snow Stability and Avalanche Hazard

A few minor instabilities remain on steep slopes on many aspects, particularly during the afternoon as the temperature rose. Most affected were North-East to South-East aspects above 900 metres. Some unstable cornices remain. The avalanche hazard is Moderate

Mountain Conditions

Observed Mountain Travel Conditions

Snow softening through the day. Generally good visibility, although one cloudy spell. Winds approx 10 - 20 mph from the East.

Comments

Feels very spring like below about 700 metres, but very much still winter on the tops.
