

**Avalanche Hazard Forecast for Saturday 17/12/2016**

**Avalanche Problems**

**Forecast Snow Stability & Avalanche Hazard**

Snow cover will consist of shallow and isolated patches at the tops of North and East aspects above 1100 meters. Patches will continue to slowly thaw and will generally be stable. There will be no avalanche hazard.

**Forecast Weather Influences**

It will remain dry through the period. After a slightly cooler night the freezing level will rise above the summits during the morning.

**Comments**

Snow cover very limited and patchy.
