

## Avalanche Hazard Forecast for Monday 19/12/2016

### Avalanche Problems

### Forecast Snow Stability & Avalanche Hazard

Forecasted weather will bring little change to the existing negligible snow cover. No Avalanche Hazard.

### Forecast Weather Influences

It is expected to remain mainly dry with a little rain at all levels during the late morning - midday. The freezing level will be above the summits overnight and through the morning, then becoming cooler during the afternoon with the freezing level dropping just below summits by dusk. Winds moderate to strong Southerly veering Westerly.

### Comments

It doesn't look at all like winter.
