

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 02/01/2017

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. Areas of old, frozen and stable snow will be found on mainly North to East aspects above 900 meters. There may be some very shallow and avoidable fresh deposits on East to South aspects. These are not expected to be significant. The avalanche hazard will be Low.

Forecast Weather Influences

There will be a few snow showers through the period. The freezing level will slowly rise to around 800 meters by the end of the afternoon. Moderate winds will be from between the North-West and the North.

Comments

Happy New Year from a not very snowy Lochaber.
