

## THE AVALANCHE HAZARD WILL BE LOW

### Avalanche Hazard Forecast for Thursday 05/01/2017

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

The snow cover is limited to old re-frozen snow, mainly around coire rims. Isolated patches only down to 750m. Stability is good. The avalanche hazard will be Low

#### Forecast Weather Influences

The high pressure will maintain dry and cool conditions. A temperature inversion will begin to affect the area towards the end of the day. The light mainly Easterly winds overnight will strengthen South South East, becoming strong Southerly.

#### Comments

Some ice is developing in the usual Post Face lines, this in the main appears to be fairly cosmetic and any climbing conditions will be very lean!
