

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 09/01/2017

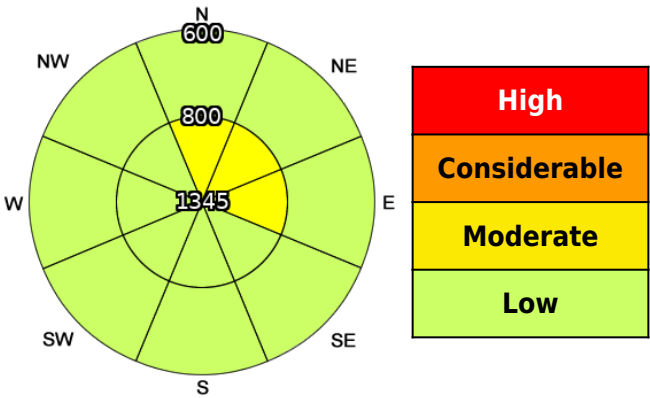

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Areas of unstable windslab will be deposited in sheltered locations on mainly North to East aspects above 800 meters through the day. Coire rims and the tops of gullies will be most affected. These deposits are not expected to be particularly deep or extensive. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will remain mild overnight. Early in the morning the freezing level will drop to around 700 meters. Through the day showers will fall as snow. Strong winds will be from the South-West.

Comments

A return to more wintry conditions expected on Monday, with further snow through the week.
