

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Thursday 19/01/2017****Avalanche Problems****Gliding Snow****Forecast Snow Stability & Avalanche Hazard**

The depleting snow pack which lies on North-East through to South aspects above 700 metres will continue to thaw but will remain stable. The avalanche hazard will be Low.

**Forecast Weather Influences**

Strong South-West winds will continue with outbreaks of slight drizzle and perhaps a chance of some light snow flurries on the higher summits due to the strengthening inversion as cold air undercuts the warmer air. No significant precipitation is expected.

Comments

A reasonably dry day with pleasant travel conditions in the glens.
