

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 06/02/2017

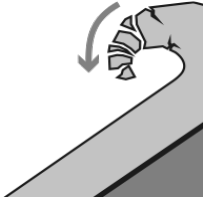

Avalanche Problems

Wind Slab

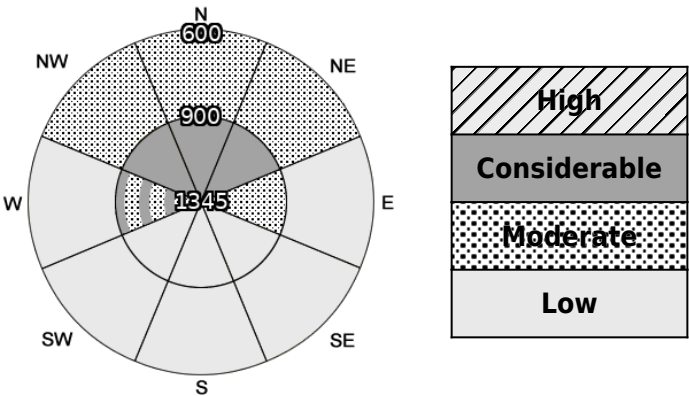

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Areas of windslab will remain in sheltered locations on mainly, but not exclusively, North-West to North-East aspects above 900 metres. Through the day sheltered Westerly aspects will become increasingly affected by windslab transported by the wind. Unstable cornices will remain. The avalanche hazard will be Considerable.

Forecast Weather Influences

It will be generally dry with strengthening South-Easterly winds. The freezing level will be around 600 metres

Comments

A band of snow reaching the area just beyond the end of the forecast period likely to increase the hazard.
