

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 20/02/2017

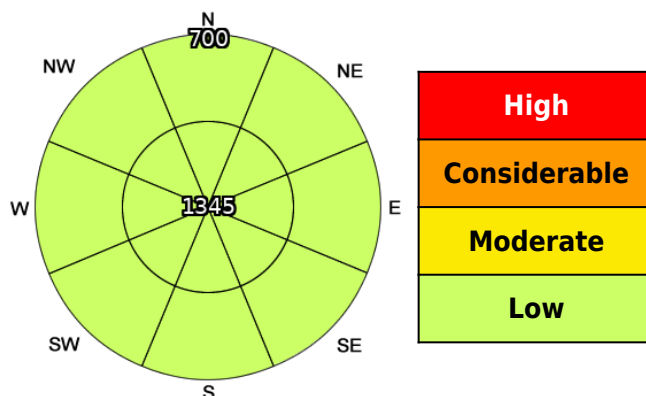

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

Overnight and through the morning the snowpack will continue to thaw. Any remaining cornices will be prone to collapse. During the afternoon the snowpack will consolidate in the colder temperatures. Stability will generally be good. Any fresh deposits will be shallow and generally avoidable. The avalanche hazard will be Low.

Forecast Weather Influences

It will be mild with rain at all levels overnight and during the morning. Through the afternoon the freezing level will fall to around 800 metres at the end of the period, and there may be a few snow showers. Winds will be from the West.

Comments

Hopefully a return to winter around the middle of the week.
