Torridon

Avalanche Hazard Forecast

Issued 04/03/2017

FOR PERIOD 18:00HRS Sat 04/03/2017 TO 18:00HRS Sun 05/03/2017

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 05/03/2017

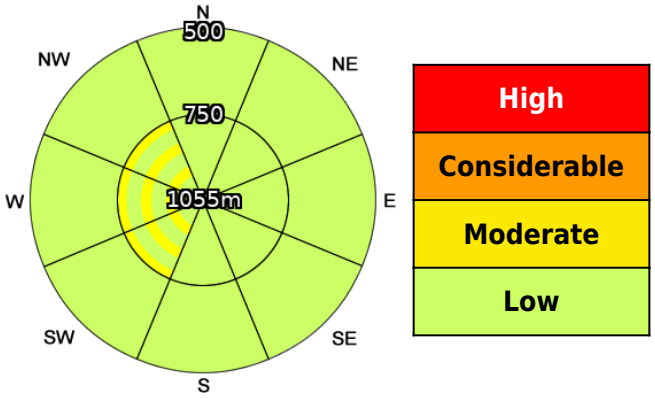
Avalanche Problems

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Snow will continue to drift and form localised areas of unstable windslab on South-West to North-West aspects. Most affected areas will be steep scarp slopes, corrie rims and gully exits above 750 metres. Possible minor cornice development above steep slopes on the same aspects. Many windward slopes will remain scoured. The avalanche hazard will be Moderate



Forecast Weather Influences

Winds easing during the night and becoming East-South-Easterly in direction. Showers falling as snow above 700 metres but dying out by dawn.

Comments

A pretty dreich day with little visibility above 700 metres. Hopefully a better day tomorrow.
