

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 11/03/2017

Avalanche Problems

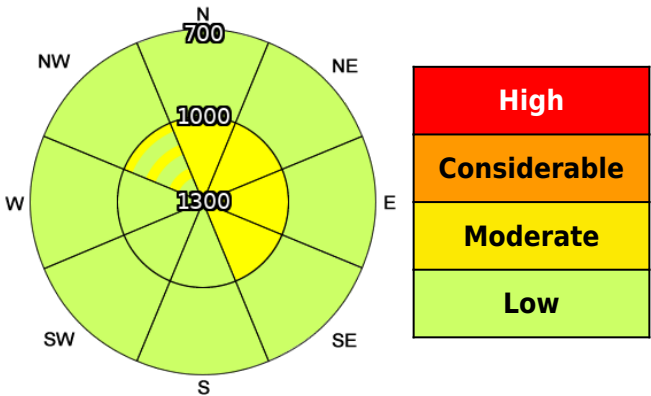

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to consolidate and be generally stable on most aspects and altitudes. Some instabilities will persist within deeper accumulations on North through East to South-East aspects above 1000 metres. Areas most affected will be within steep and convex terrain, and around corrie rims. Cornices will be unstable and prone to collapse. The avalanche hazard will be Moderate

Forecast Weather Influences

It is expected to be dry with moderate Southerly winds winds easing through the day and veering South-Westerly. The freezing level will remain above the summits throughout.

Comments

Looking mild over the weekend, with potential for rockfall and cornice collapse.
