

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 12/03/2017

Avalanche Problems

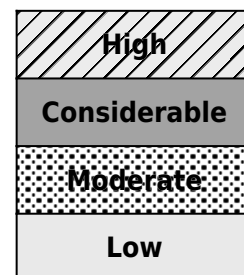

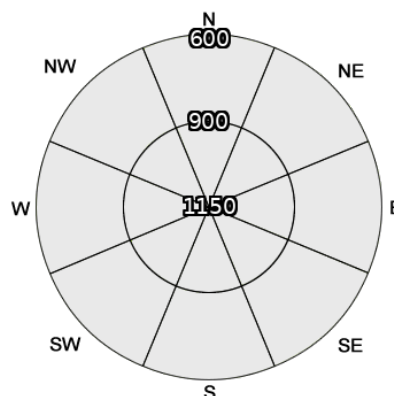

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snow cover will continue to slowly thaw in the mild conditions. Remaining cornices will be prone to collapse. Falling ice will also be a hazard. Greatest amounts of snow will be found on North to East aspects above 900 metres. The avalanche hazard will be Low.

Forecast Weather Influences

The freezing level will be above the summits but will drop late afternoon to around the higher tops. Generally cloudy with some drizzle at times. Winds initially South, backing and strengthening to become moderate in strength from the West-North-West by the end of the day.
