

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Monday 27/03/2017****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

There will be little change to the current situation with stable, well bonded snow present on all aspects. The snow will continue to thaw and the risk of cornice collapse and rock or ice fall will remain a concern. The avalanche hazard will be Low.

**Forecast Weather Influences**

It will be another dry and warm day but with some early morning mist and possibly more cloudy conditions in the afternoon. The freezing level will be well above the summits with a high of plus six degrees forecast at 930 metres. Winds will be light, occasionally moderate South-South-Easterly.

Comments

Sunnier conditions expected in the north of the forecast area than in the south.
