

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 29/03/2017

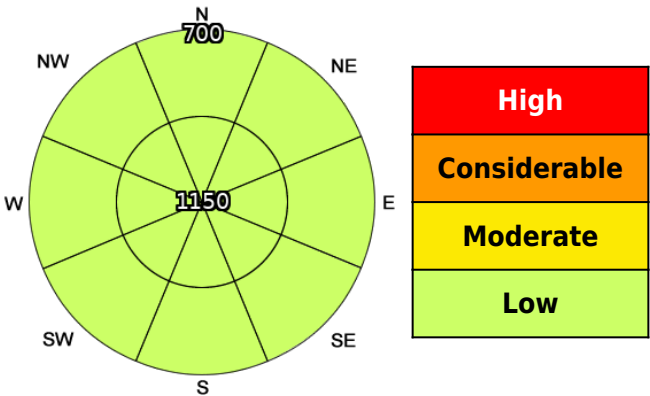

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will become more moistened and soft in the thaw conditions but will remain generally well bonded and stable. There will be potential for further rockfall and cornice collapse. The avalanche hazard will be Low.

Forecast Weather Influences

The freezing level will remain above the summits. After periods of drizzle through the evening it will remain dry until the afternoon when there will be some heavier outbreaks of rain. The moderate South-South-Easterly wind will strengthen through the day.

Comments

Changeable weather towards the end of the week.
