

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 31/03/2017

Avalanche Problems

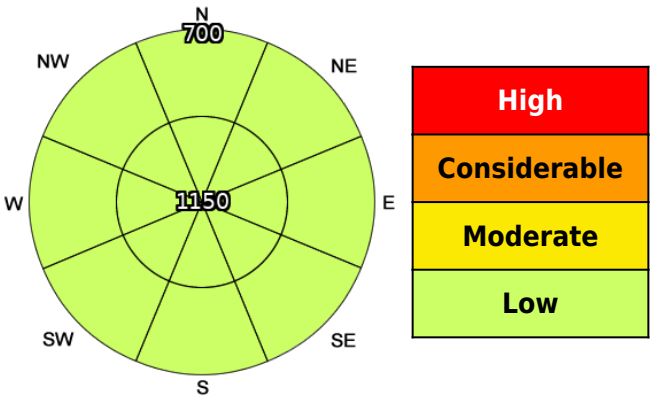

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain soft and moist at all levels, general stability will remain good on all but the steepest slopes where surface wet snow instabilities may develop. Any remaining cornices will be prone to collapse. Hazard of rockfall will remain below crags. The avalanche hazard will be Low.

Forecast Weather Influences

It will remain mild with freezing levels above the summits, Rain at all levels will be heavy at times through the day. Winds will be variable Southerly mainly fresh with stronger gusts.

Comments

Snowpack continues to retreat gracefully with the mild conditions today. Greatest accumulations remain in the high North and East corries. Mild and wet outlook.
