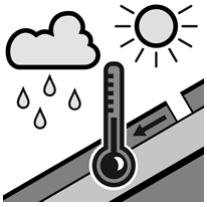
FOR PERIOD 18:00HRS Sun 02/04/2017 TO 18:00HRS Mon 03/04/2017

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 03/04/2017

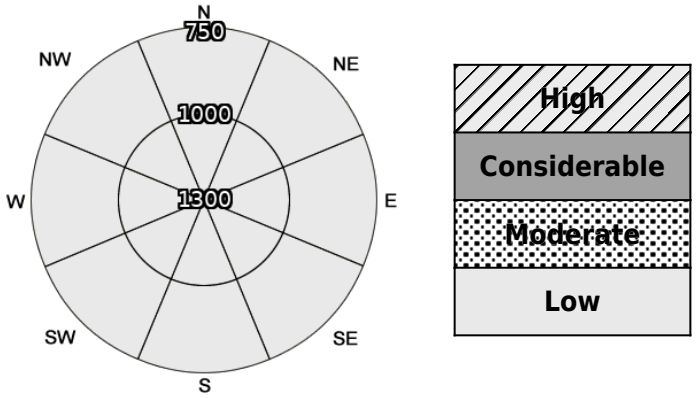
Avalanche Problems



Wet Snow

Forecast Snow Stability & Avalanche Hazard

The depleting snowpack on North to Easterly aspects above 950 metres will continue to diminish and remain well bonded and stable throughout. Some surface instabilities are possible on very steep slopes. Rockfall will be a potential hazard. The avalanche hazard will be Low.



Forecast Weather Influences

Dry conditions up until the afternoon when rain is expected at all levels. Southerly winds will increase strong to gale force through the day, the freezing level will rise to well above the summits.

Comments

DAILY Northern Cairngorms Avalanche forecasts end for the 2016/17 winter season
However, we will continue to monitor weather and snow conditions leading up to and during the Easter holidays. Mountain information will continue to be provided on the SAIS blogs for the next period and for the easter weekends.
