

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 19/12/2017

Avalanche Problems

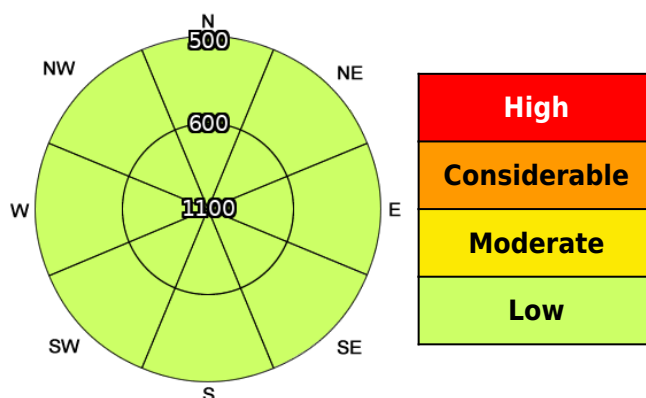

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Little change. The snowpack will continue to thaw but remain reasonably well stabilised in most locations. Remaining cornices will continue to soften and become collapse-prone mainly on very steep East to South aspects. The avalanche hazard will be Low

Forecast Weather Influences

A few very light rain showers are possible but otherwise dry. Staying mild at all altitudes. Moderate to strong South West winds.

Comments

Complete cover on E to S aspects above 600m. Distinctly patchy at lower altitudes now.
