

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 07/01/2018

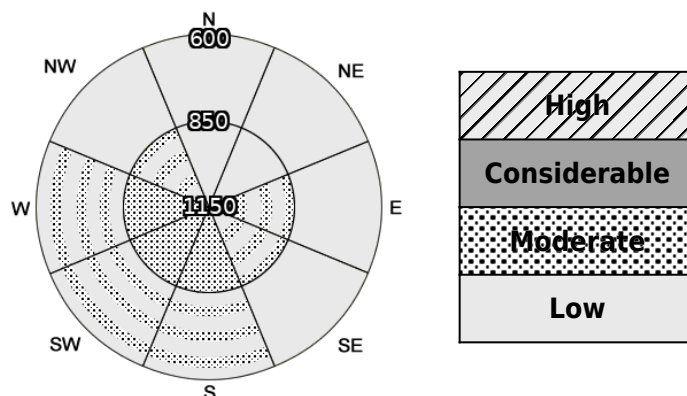

Avalanche Problems

Persistent Weak Layers

Forecast Snow Stability & Avalanche Hazard

Moderately bonded windslab will be present in steep sheltered terrain, mainly on South to West aspects above 850 metres but also on some East, South-East and North-West aspects. Steep convex slopes, corrie rims and gully exits will be particularly affected. Elsewhere, snow cover on wind exposed terrain will be thin with deep drifts in any lee locations. The avalanche hazard will be Moderate.

Forecast Weather Influences

Cold at all levels with good visibility. Winds will be variable but very light.

Comments

Cold clear conditions forecast for Sunday.
