

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 12/01/2018

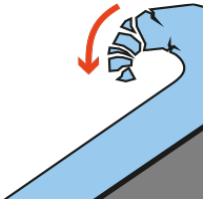

Avalanche Problems

Wind Slab

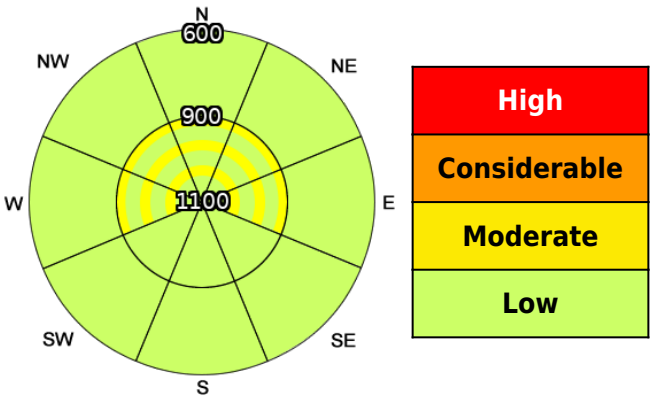

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Little change. Localised instability will persist on very steep West through North to East aspects above 900m. A little thin windslab is possible later on North West to North aspects as winds pick up and redistribute snow. Stability will remain good in most locations below 850m. The avalanche hazard will be Moderate

Forecast Weather Influences

Remaining dry with a strengthening South Easterly airflow. Cool temperatures throughout.

Comments

Curious temperature inversion conditions today.
