

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 18/01/2018

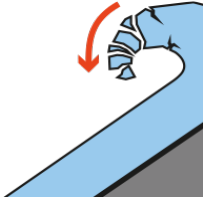

Avalanche Problems

Wind Slab

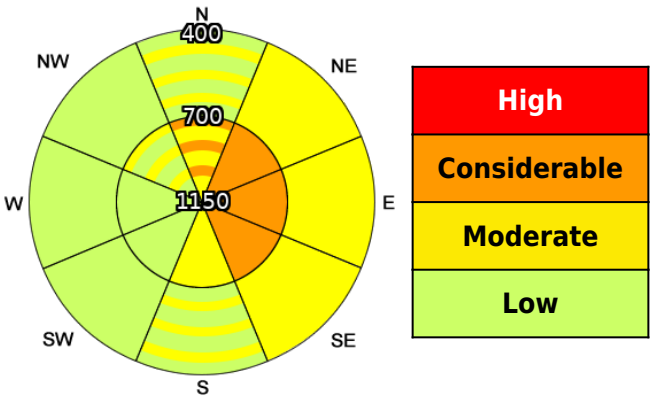

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Significant areas of unstable windslab will exist on North through East to South-East aspects above 700 metres. Unstable cornices will overhang these aspects. However, exposed windward slopes will tend to be scoured and stable. The avalanche hazard will be Considerable.

Forecast Weather Influences

Snow showers will continue throughout the period. However, they will be lighter than they have been in previous days. Moderate wind will vary from between the South-West and the West. The freezing level will be around 400 metres.

Comments

Deep snow making for hard going on foot at the moment.
