

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 27/01/2018

Avalanche Problems

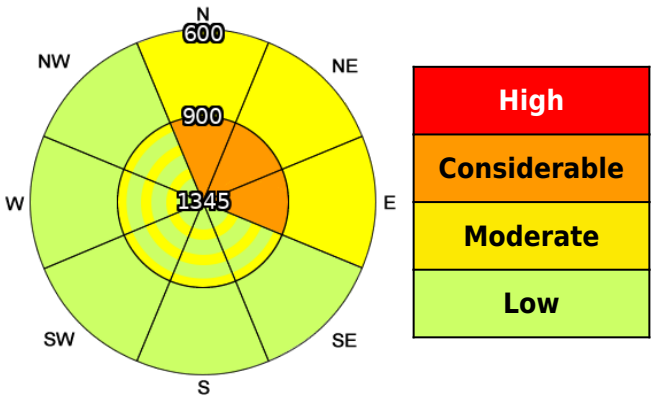

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

There will be a period of instability overnight and during the morning as the snowpack becomes saturated. Avalanches are likely on North to East facing slopes and gullies above 800 metres. Cornices will be prone to collapse. Stability will improve in the colder conditions during the afternoon. The avalanche hazard will be Considerable.

Forecast Weather Influences

After a few overnight snow showers the freezing level will rise above the summits early in the morning, then heavy rain at all levels. During the afternoon the freezing level will drop to around 800 metres, and showers will turn back to snow. Strong South winds will veer to the West.

Comments

A wet weekend expected in Lochaber.
