

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 19/02/2018

Avalanche Problems

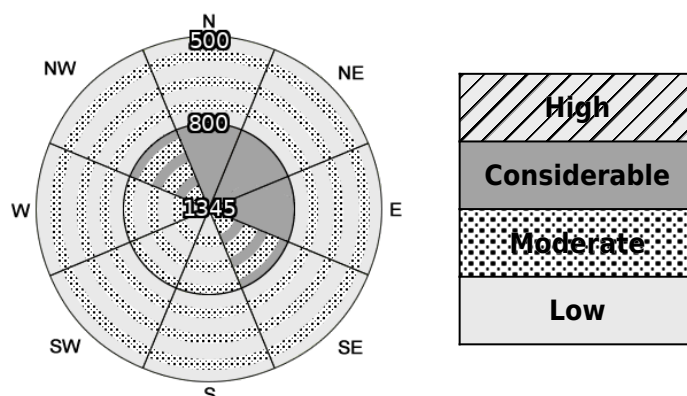

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will become increasingly unstable as it becomes wet. Avalanches are likely on North to East aspects above 800 metres. The large cornices which overhang these aspects will be prone to collapse. Stability should improve slightly in the drier conditions expected during the afternoon. The avalanche hazard will be Considerable.

Forecast Weather Influences

Some drizzly rain is expected overnight and early morning. The afternoon is expected to be drier. The freezing level will remain well above the summit throughout.

Comments

Colder more settled conditions on Tuesday and Wednesday. Snowpack expected to consolidate.
