

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Monday 26/02/2018****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Little change is expected, the snowpack will remain frozen, stability will generally be good in most locations. Many areas will be very firm and icy. The avalanche hazard will be Low.

**Forecast Weather Influences**

It will continue to be cold and dry, mostly freezing at all levels. The winds will be strong through the night then easing during the day, mainly from an East-South-Easterly direction.

Comments

The snowpack is firm and very icy in many places with serious run-outs in the event of a slip or trip. As Edward Whymper quoted - Climb if you will, https://www.goodreads.com/author/quotes/607614.Edward_Whymper Snow is forecast for Eastern ranges staying dry in the West.
