

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Tuesday 20/03/2018

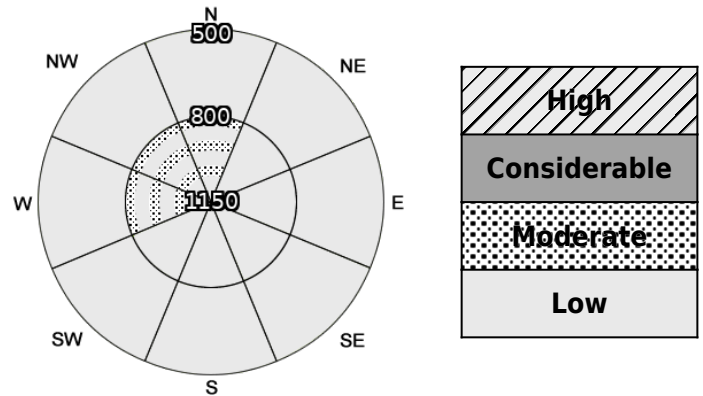

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. Some areas of moderately bonded windslab will exist, these being mainly on sheltered West to North aspects above 800 metres. They will also tend to be localised and generally avoidable. Elsewhere the snowpack will be hard, icy and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will remain dry through the period. The freezing level will rise to around 700 metres. Winds will be light and variable.

Comments

Another pleasant day expected on Tuesday before turning mild and wet on Wednesday.
