

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 14/04/2018

Avalanche Problems

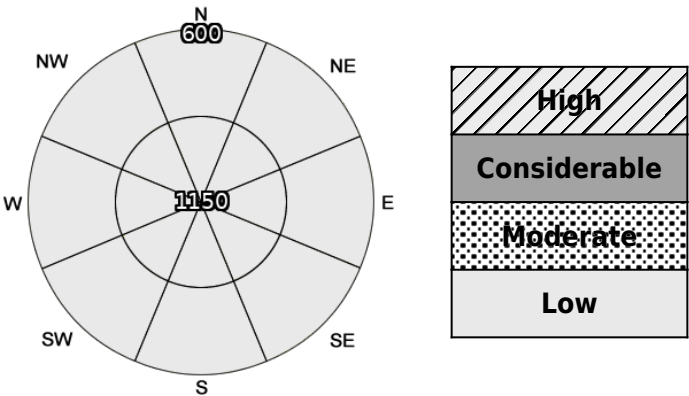

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to slowly thaw and consolidate, and will be generally stable. Patchy wet, soft snow cover at lower elevations, but reasonable cover remains above 650 metres. Some wet snow surface instabilities are likely on steeper slopes. Unstable, large cornices remain, mainly above North-West to East aspects, and very prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Mostly dry through the period, with cloud gradually clearing during Friday morning and sunny spells developing. Light to moderate Southerly winds and the freezing level will be above the summits.
