

**THE AVALANCHE HAZARD WILL BE MODERATE**

**Avalanche Hazard Forecast for Sunday 16/12/2018**

**Avalanche Problems**

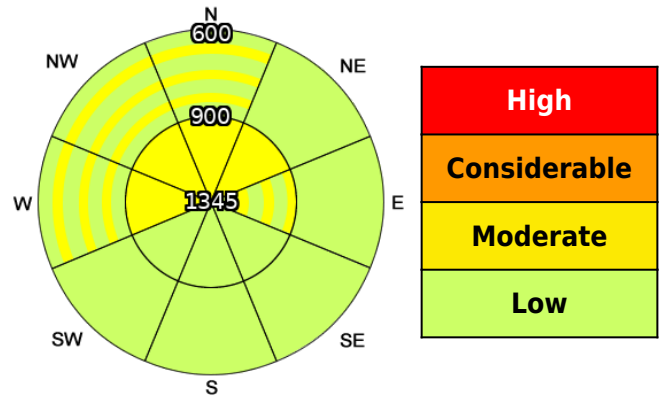

Wind Slab

Cornices

**Forecast Snow Stability & Avalanche Hazard**

Fresh unstable windslab will be deposited throughout the forecast period. Accumulations will form in wind sheltered areas, mainly on West through North to North-East aspects above 900 metres. East aspects will also be affected. Cornices above these aspects will also start to build. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

Very strong East-South-East winds will ease overnight to strong South-Westerly, later Southerly. A period of snowfall is expected overnight, with snow showers continuing above 700 metres through the day. The freezing level will be around 800 metres.

**Comments**

A wintry day is expected.
