

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 21/12/2018

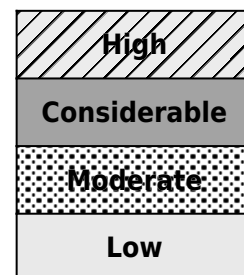

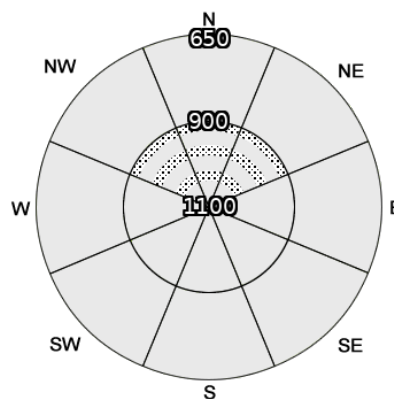

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Some new localised and moderately bonded soft windslab is possible on very steep North West through North to North East facing gully tops above 900m and around coire rims. Elsewhere the very limited snowpack will be stable. The avalanche hazard will be Moderate

Forecast Weather Influences

Further showers over the period with light snow above 800metres, dying away by mid-afternoon. Winds will be moderate, generally South-Westerly.

Comments

Hopefully starting to look a little bit wintrier over the next period
