

**THE AVALANCHE HAZARD WILL BE MODERATE**

**Avalanche Hazard Forecast for Friday 21/12/2018**

**Avalanche Problems**

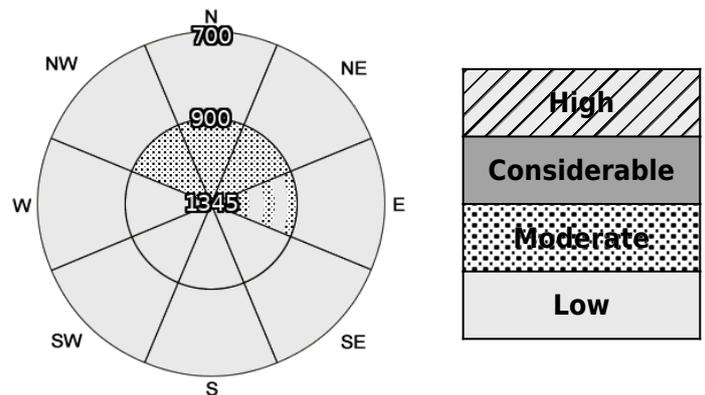

**Wind Slab**

**Cornices**

**Forecast Snow Stability & Avalanche Hazard**

Windslab will continue to be deposited in sheltered areas, mainly on North-West to North-East aspects above 900 metres. East aspects will also be affected. Gullies, coire rims and lee flanks of ridges will be most affected. The old snowpack will be generally stable. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

Showers are expected to continue throughout the forecast period, falling as snow above around 800 metres. Winds will be moderate South-South-Westerly or Southerly.

**Comments**

A bit more wintry at the moment.
