

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 29/12/2018

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Very sparse snowpack limited to coire rims, gully tops and isolated patches above 900 metres. A light dusting of new snow is possible around summits. Conditions will remain stable. The avalanche hazard will be Low.

Forecast Weather Influences

It will be slightly cooler than of late with Freezing levels fluctuating around summits. Some overnight rain and strong South-Westerly winds will ease and give way to a generally dry day.

Comments

Any snow likely to be limited to very tops and cosmetic only
