

THE AVALANCHE HAZARD WILL BE LOW**Avalanche Hazard Forecast for Monday 31/12/2018****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

The patchy old snow will continue to slowly thaw but will remain well bonded and stable. Deepest accumulations will be encountered in sheltered locations on West through North to North-East aspects above 950 metres. The avalanche hazard will be Low.

**Forecast Weather Influences**

A dry but foggy day has been forecast with gale force West-South-Westerly winds. The freezing level will remain well above the summits with the air temperature at 900 metres ranging between plus 3 and plus 4.5 degrees centigrade.

Comments

Unlikely to be a pleasant mountain day with the potential for very strong winds over the summits. Turning colder on Tuesday.
