

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 01/01/2019

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

What remains of the very sparse snowpack will freeze and become hard or crusty. A very thin dusting of snow is possible in most places above 500m though little or no drifting is anticipated. Good stability in all locations. The avalanche hazard will be Low

Forecast Weather Influences

Wet overnight then dry. Much colder during the day with the occasional light snow shower. Light to moderate North West winds during daylight hours.

Comments

Very limited snow cover. Becoming much colder; freezing level falling to 500m during the day.
