

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 03/01/2019

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Good stability in all locations. Remaining patches of snow are primarily around coire rims on North to East aspects. The avalanche hazard will be Low

Forecast Weather Influences

High pressure will maintain the dry and cool conditions. High cloud (generally above summit levels) will continue to build. The winds will be fresh South-Westerly.

Comments

Good walking, although the ground is now hard underfoot with ice developing on high paths and in watercourse areas.
