

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 05/01/2019

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain limited in extent and mainly found above 900 metres. What does exist will remain firm and stable. The avalanche hazard will be Low.

Forecast Weather Influences

High pressure maintaining the dry, cool, cloudy conditions. Winds remaining South-Westerly in direction becoming light overnight and gradually increasing in strength during the day.

Comments

Very little change in the present weather due to a high pressure inversion.
