

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 06/01/2019

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The very sparse snowpack will remain well stabilised in all locations. The avalanche hazard will be Low.

Forecast Weather Influences

Some overnight drizzle at all levels. It will be dry during the day as a cool North-Westerly airflow lowers freezing levels to just below summits. The winds will be light.

Comments

Some blustery conditions on horizon after weekend
